

无线网络安全

airport创建链接方便使用	2
安装aircrack-ng	2

```
sudo /System/Library/PrivateFrameworks/Apple80211.framework/Versions/Current/
Resources/airport en0 sniff 1 (en0是所使用网卡的名称, sniff表示模式, 1是信道)
```

airport创建链接方便使用

```
cd /usr/local/bin
sudo ln -s /System/Library/PrivateFrameworks/Apple80211.framework/Versions/
Current/Resources/airport
airport en0 sniff 1
```

安装aircrack-ng

1. brew install aircrack-ng
2. 使aircrack-ng可运行
 - 2.1 创建链接

```
cd /usr/local/bin
sudo ln -s /usr/local/Cellar/aircrack-ng/1.1_2/bin/aircrack-ng
sudo ln -s /usr/local/Cellar/aircrack-ng/1.1_2/sbin/aireplay-ng
```
 - 2.2 将 /usr/local/Cellar/aircrack-ng/1.1_2/bin和 /usr/local/Cellar/aircrack-ng/1.1_2/sbin加到~/.bash_profile的PATH中
